

these are the overall features

```
['age', 'height', 'weight', 'diet_type', 'iron_rich_diet', 'sleep_hours', 'stress_level',  
'childbirth_history', 'menstruates', 'period_delay_medication', 'cycle_length', 'bleeding_duration',  
'cycle_regularity', 'heavy_bleeding', 'spotting', 'white_discharge', 'pain_level', 'pms_severity',  
'anemia_symptoms', 'pcos_symptoms']
```

Approach for labelling data

1.For Anemia

```
anemia_symptom_cols = [
```

```
    'brittle nails', 'clotting', 'cold hands and feet', 'constant tiredness or weakness', 'dizziness',  
'hair fall', 'headache', 'pale skin or pale lips', 'shortness of breath']
```

if user has more than 2 symptoms and has

other factors: bmi, low iron diet, heavy bleeding with clots, poor sleep

then labelled with risk of anemia.

2.For Pcos

```
pcos_symptom_cols = ['acne or oily skin', 'dark patches on skin',
```

```
    'excess facial or body hair', 'hair thinning or hair fall',
```

```
    'missed periods', 'mood swings', 'sugar cravings',
```

```
    'weight fluctuations']
```

if user has more than 2 symptoms and has

other factors : cycle irregularity, period delay medication is taken, bmi, stress, white discharge

then labelled with risk of pcos
